## A Word from the Mayor

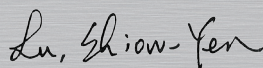

# Creating a Low-carbon Energy City

Taiwan's bicycle industry plays a pivotal role in the global market. Located near the center of Taiwan, Taichung boasts an extensive and highly-competitive bicycle industry cluster, and is a global R&D and manufacturing stronghold for mid-/high-end bicycles. Apart from possessing a strong bicycle industry foundation, highly attractive bike paths, and the convenient iBike public bicycle system, Taichung has also been striving to improve its bike routes and establish "bike stations" offering parking, recreation, and supply services. The city is continuously upgrading its bicycles hardware and software, and hopes to become a livable, low-carbon energy, cycling-friendly city.

The "Taichung Bike Week" activity held by Taichung each year has become a major annual event for the global bicycle industry. As a result of this event, whenever people in the cycle industry think of bicycles, they think of Taichung. In addition, the event also highlights the Taichung city government's continuing efforts to boost the industry's growth and global sales expansion. This year's Taichung Bike Week will be held October 16-18 at the Splendor Hotel Taichung, Evergreen Laurel Hotel, and Tempus Hotel Taichung. The event is geared to trading companies and product managers at mid-/high-end OEM parts manufacturers and bicycle firms, and provides companies with a B2B trade show platform for consultation concerning new bicycle specifications. This year's Taichung Bike Week is expected to be 15% larger than last year's. Taichung city government's hopes that its promotion of bicycle industry events, continuing support and assistance to the industry, and this Taichung Bike Week exhibition activity will help domestic and foreign firms to make contact with the local bicycle industry cluster, bear witness to Taichung's globalization, and appreciate Taichung's enthusiasm for bicycles and bicycle-friendliness.

Apart from the promotion of Taichung Bike Week, Taichung city government is also actively encouraging the cycle industry's transformation. In conjunction with the Industry 4.0 revolution, the industry is upgrading to smart machinery, and adopting automation, cloud technology, and big data analysis. In this process, the city government is assisting companies to improve their equipment and production processes, so that they can keep up with current trends and produce high-quality products and services.

As it undergoes its own transformation to a livable, low-carbon energy city, Taichung city government will continue to exert its full effort toward making Taichung a bicycle-friendly city. The city government also hopes that the industry will continue to grow, prosper in global markets, and transform Taichung into an outstanding sporting metropolis. Mayor Lu Shiow-yen predicts that the 2019 Taichung Bike Week will be a great success and the Taichung bicycle industry will continue to flourish.

## 打造低碳綠能城市

**台**灣自行車產業在全球自行車市場佔有舉足輕重的地位，而臺中位於台灣的中心點，挾完整且高競爭力的自行車產業聚落，更成為全球中、高級自行車的研發與製造重鎮。除了擁有堅實的自行車產業基礎，以及超人氣的自行車道與便民的iBike公共自行車系統，臺中更進一步優化自行車道，建置具停放、休憩及補給服務的自行車驛站，充實軟硬體，期打造更低碳綠能的宜居城市與cycling友善城市。

臺中每年舉行的「臺中自行車週」(Taichung Bike Week)活動，已成為全球自行車產業的年度盛事，讓許多國內外自行車業者只要一想到自行車，就會想到臺中，更凸顯台中市政府持續提升自行車產業成長與拓銷全球的決心。今年的台中自行車週活動將於10月16日至18日在金典酒店、長榮桂冠酒店及永豐棧酒店舉行，這個展覽活動是針對全球中高級零件代工生產廠商和成車廠產品經理、貿易商所設置的平台，提供業者洽談隔年度新車規格的B2B商展平台，今年的展會規模較去年成長15%。台中市府希望藉由自行車產業活動的推動，同步持續提供產業各方面的支援及協助，也希望藉由本次台中自行車週展覽活動，讓國內外廠商可以來到自行車產業聚落，見證台中的國際化，並感受台中對於自行車的熱情與溫度。

台中市政府對於自行車產業的重視，除了推動台中自行車週、也積極致力於產業的升級，在硬體設備上結合工業4.0革命，以智慧機械、自動化導入雲端科技、大數據運作，協助相關業者將器材與生產流程改善，接軌時代趨勢潮流，打造出更高品質的商品與服務。

邁向低碳綠能的宜居城市，市府將全力打造台中成為自行車友善城市，也希望協助自行車產業持續壯大，在全球市場發光發熱，並打造台中成為優質的運動城市。秀燕在此預祝2019台中自行車週活動圓滿成功，台中自行車產業蓬勃發展。

# Preventing Illegal Shipments

Text: Grace S. Ruan

Taiwan exported a total of 1,465,614 bicycles from January to August of 2019, and while this figure represented increase of 0.89% compared with the same period of 2018, average unit price fell by 7.55% from US\$653.83 to US\$604.47. The EU is largest export market for Taiwan's bicycles, and Taiwanese firms shipped 689,778 bikes in 2019 to August; this figure was a decrease of 4.29% compared with the same period the previous year. The United States is Taiwan's second largest market, and imported 492,281 Taiwanese bikes during this period; this figure represented large-scale 40.31% growth and revealed that the bicycle market is gradually improving.

E-Bikes are currently the bicycle industry's rapidly-growing star product. Taiwanese firms exported 404,050 e-bikes during the first eight months of 2019, which represented an increase of 132.34% compared with the same period of 2018. In contrast, the average unit price of Taiwan's e-bikes fell by 8.69% from US\$1393.75 to US\$1272.59. The EU is also Taiwan's largest e-bike export market, and imported 201,826 e-bikes from Taiwan from January to August of 2019, which was an increase of 128.91% compared with the 88,168 e-bikes exported to the EU during the same period of 2018. Taiwan's bicycle industry is going all-out to ramp up e-bike production, and produces an increasing number of e-bike parts—even auto manufacturers are currently developing key parts and components. As a result, we are certain that Taiwan's influence on the e-bike market will continue to grow. The fact that the EU has become aware that illicit transshipment of bicycles and e-bikes through Taiwan has caused a high degree of concern in Taiwan's Board of Foreign Trade and the Taiwan Bicycle Association (TBA), and Taiwan will begin implementing strict review of proof original place of production for bicycles and e-bikes bound for Europe and will issue proof only when products are free from question.

In the case of Europe, the anti-dumping and anti-subsidy tariffs (18.8%-79.5%) that the EU has imposed on Chinese e-Bikes have stopped European sales of Chinese e-bikes in their tracks. Some companies have responded to this action by establishing plants in Europe (including in Poland, Czech Republic, Hungary and Germany). Furthermore, in order to escape the EU's high trade barriers, numerous firms have opted to establish plants in Vietnam, Cambodia and India, of which the most plants have been established in Vietnam, followed by Cambodia.

The South Asian bicycle industry—especially the bicycle industries of India, Bangladesh, and Sri Lanka—are also worthy of attention. The forementioned three countries have a combined population of 1.6 billion—22% of the world's total population—and their economic situation is gradually improving. India is already the world's 5th largest economy (after the US, China, Japan and Germany), and is the world's second-largest bicycle producing country. India's bicycle industry is largely clustered in the city of Ludhiana. With its 1.35 billion population, India is a country well worth watching. Located close to India, Sri Lanka has been dubbed the "Hawaii of the East." Blessed with beautiful beaches and alluring blue sapphires, Sri Lanka is also known for its tea. Sri Lanka's five major bicycle producers (Asiabike, BSH Cycle, DSI, CityCycle, and Creative Cycle) have a combined annual output of 750,000-800,000 bicycles, of which Asiabike exports all of its output, chiefly to the EU. Asiabike has recently become an OEM producer for Giant, and the two companies plan to sell their bikes cooperatively in the Indian market. The Sri Lankan and Indian bicycle industries are closely linked, and well worth watching in the future. With a population of 170 million, Bangladesh is currently improving its economy and infrastructure. This Muslim country—which is home to the world's most three-wheeled vehicles—has an annual bicycle output of 1.3 million units. Germany's Cube and Bangladesh's Meghna formed a joint venture in November 2018, and Meghna will produce frames and bicycles in its plant. The largest share of the Bangladeshi bicycle industry's exports go to Britain. In view of its annual output of 1.3 bikes and Cube's choice to move production to Bangladesh, this country is also worthy of further observation.

2019 Taichung Bike Week (TBW) will be held from 10/16 to 10/18. In contrast, to the decline experienced by other international bicycle trade shows, compared with last year, TBW will be 15% larger this year, which suffices to show that this OEM show has become a must-attend event for European and American brands looking for opportunities to nail down specs for the coming year. We welcome buyers from around the world to Taichung, and look forward to a successful event. We also wish the global bicycle industry a prosperous 2020.

# TBW 2019 Returns to Growth

Once again, it is with much pride and joy that the TBW team would like to extend a warm welcome to all visitors and exhibitors taking part in the global bike industry's premier OE-dedicated event - Taichung Bike Week.

Just over one decade ago, TBW was only a few companies renting rooms in The Tempus to introduce our products to the OE product managers staying there. In that short time, TBW has grown rapidly every year to become the inimitable event it is today. This incredible growth has been 100% organic, developing entirely from the needs and desires of the bicycle industry. The format, timing and location of TBW ticks all the boxes that the industry, both vendors and buyers, need.

Although exhibitor numbers fell for last year's event, we are very pleased to see that this year's TBW has returned to double digit growth for 2019. This week, 407 manufacturers will be introducing their latest products in over 492 booths at Taichung's Evergreen, Splendor and Tempus hotels – an increase of 15% over last year. 100 companies are located in 111 booths at the Evergreen Hotel, while 229 companies are displaying in 291 booths in the Splendor Hotel and 78 companies occupy 90 booths at the Tempus Hotel.

The return to growth for 2019 TBW is no doubt in large part due to re-scheduling of Taipei International Cycle Show back to its more traditional timing in Spring. In 2018, when Taipei show and TBW both shared fall dates, both events noticed a decrease in exhibitor numbers.

TBW's growth also speaks volumes to the current format of the event.

Taichung Bike Week is unique, it is not just 'another show' in the fall. There isn't a trade show on earth that offers the same amount of efficiency, or the same level of business opportunities at the kinds of costs that exhibitors at TBW are able to take advantage of. The show is held in Taichung for a reason— everything is here on your doorstep. The vast majority of the Taiwanese bike industry have facilities nearby, so visitors are never more than a 40-minute drive from 85% of the bicycle industry in Taiwan.

Taichung Bike Week receives a lot of support from Taichung City Government. We are very grateful to newly-elected Taichung Mayor, Lu Shiow-yen, and Taichung city officials for their continued support for, and commitment to, TBW and the global bicycle industry. In addition to TBW information services, the city government is hosting a Welcome Party with a Chinese style dinner on the first day of the show. The welcome party will be held in the Starlight Hall on the 6th floor of the Lin Hotel Taichung on October 16th, 2019. Doors will open at 18:30 and the dinner will start at 19:00. As places for the party are limited, online registration at the TBW website is needed.

Along with Taichung city government, Taiwanese bicycle industry publisher, Wheel Giant, has been co-organizing TBW for over 10 years. Wheel Giant publishes the TBW Show Daily and the Show Guide for the convenience of both exhibitors and visitors to Taichung Bike Week.

Finally, we, the TBW Team, would like to welcome all visitors and exhibitors to this years' event and we wish all buyers and vendors participating in the 2019 Taichung Bike Week a successful show and very prosperous year.

## 6CBB

Bottom Bracket

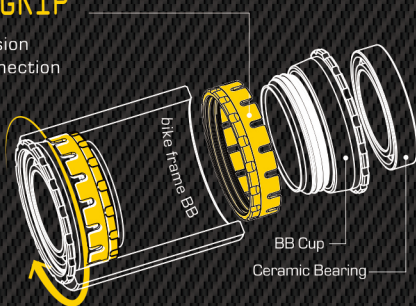

6CBB Gecko Grip technology consists of a threaded BB cup and a Gecko Grip ring. When threaded into the frame, the ring increases its diameter due to the sloping attack angle of the cup. This creates a tight connection even in frames with wide tolerances, avoiding creaking noises.

## GECKO GRIP

GECKO GRIP expansion ensures a tight connection

- press fit & threaded all sizes
- Thermo-formed Carbon built
- lightest in the world – 60g
- ceramic ball bearings

Tight connection, easy installation and zero noises from your Press-Fit frame.
